- Qualified technical engineers
- Full and accurate 'take-off'

Keystone
LINTELS

Standard Lintels

Keystone produces a wide range of standard galvanized steel and stainless steel lintels. All Keystone standard lintels satisfy the thermal performance requirements of all UK building regulations.

Stainless Steel

Keystone's full range of lintels are also available in stainless steel, providing the same high quality and performance features as our standard galvanized lintels.

Special Lintels

Keystone offers a complete custom design service to ensure your project has the best lintel for the job. Our technical expertise is renowned for delivering solutions with total efficiency.

Brick Slip Feature Lintels

Keystone Brick Slip Feature Lintels are a one piece, prefabricated unit, manufactured with factory applied brick slips. We produce Brick Feature Lintels to order and can achieve even the most challenging architectural designs.

Windpost Systems

Keystone Windposts span vertically between floors to provide additional lateral support for large panels of brickwork or large panels with openings. Keystone manufactures three types of windposts.

Cavity Trays

The Keystone Cavity Tray presents a lightweight, simple to install and long lasting solution to preventing damp from penetrating below the roof line.

By contacting our technical engineers at an early stage of the design process, you will potentially gain significantly more design flexibility for the overall project.
